ABOUT US

We are an American company proud to be one of the first to introduce stylish, affordable high end Heated Towel Racks made of the highest quality stainless steel in a variety of finishes. We serve retailers and customers throughout the United States, Canada, Mexico and the Caribbean.

We are constantly bringing innovative designs and heating technology to the forefront of our offerings which appeal to interior designers, architects and clients around the world.

Amba's exclusive product ranges are designed with residential and commercial customers in mind. We offer a variety of over 150+ Heated Towel Rack models, all in stock for quick delivery throughout North America. For those with specific needs we offer a range of special order sizes to fit any project.

Our Heated Towel Rack collections provide efficient heat while using minimal energy – consuming only as much energy as one or a few light bulbs. Various methods of heat control are available.

By making sure your towels stay warm and dry after use, the towel rack prevents mold & mildew from forming. This eliminates the gross, musty smell and enables you to reuse your towels and bathrobes more often therefore reducing trips to the laundry. Reducing laundry loads saves on water, energy, detergent and time.

Safety is always a top concern for us at Amba – our Heated Towel Racks meet stringent safety standards for the US and Canada. Our products are backed by extensive warranty coverage.

When it comes to customer service Amba is unmatched – We see it as our duty to support our clients and to respond swiftly to customer needs. We make sure that if you call you'll speak to a real and knowledgeable person! [No call centers here!] We are also available to answer your questions via our website contact form or through our company pages on Facebook, Twitter, Houzz, or LinkedIn.

WHAT ARE HEATED TOWEL RACKS

Heated Towel Racks are known by many names: Heated Towel Bars, Towel Warmers, or Drying Racks — essentially all Heated Towel Racks fulfill similar functions:

**DRY WET OR
DAMP TOWELS**

**PROVIDE DRY TOWELS WITH
ADDITIONAL WARMTH**

**ACT AS A SOURCE OF HEAT
FOR A BATHROOM**

NOT ALL HEATED TOWEL RACKS ARE CREATED EQUAL:

There are a few factors which dictate how well a particular Heated Towel Rack performs, most notably the output of it's element, and the surface area. Some models may be effective at drying towels, but may not act as a heat source.

To better understand the effectiveness of our wide range of models, it makes sense to classify them into three categories:

DRYING RACKS

These models will offer a stylish place to hang towels and to keep them dry — but usually contain lower-output heating elements or fewer bars which means that they will not be as effective at heating towels as other models.

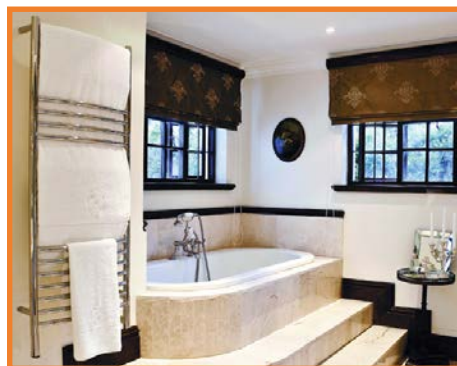

Swivel Collection
Smaller Jeeves Models
[H / I / J / F]

HEATED TOWEL RACKS

Heated Towel Racks can be considered the 'standard' models if one is looking to both dry and warm towels. Individual heating ability will depend on output and surface area, but most units will keep towels comfortably warm.

Jeeves Collection
Mid-Sized Quadro / Sirio
Solo Collection
Traditional Collection
Radiant Collection

DUAL-FUNCTION RACKS

These models contain higher output heating capacity and are usually much larger than standard Heated Towel Racks. At these output levels it is common to find digital heat controllers included for better control — as at higher settings these units can provide small spaces with a source of heat.

Large Quadro / Sirio
Elory Collection
Vega Collection
Antus Collection

HOW DO HEATED TOWEL RACKS WORK

LF LIQUID-FILLED SYSTEM:

These Heated Towel Racks contain a water/glycol mixture that is heated by a rod-like heating element running along one of the vertical bars. The warmer liquid rises as it heats up until the entire Heated Towel Rack reaches its maximum temperature. This technology will take longer to heat than a dry-element system, but is a more energy efficient system.

DE DRY-ELEMENT SYSTEM:

Also known as 'cable-heated' systems, these Heated Towel Racks have resistance wire inside each bar that heat up, transferring warmth into the bars and across the whole unit. They heat up quickly and evenly, and typically have on/off switches integrated into the design.

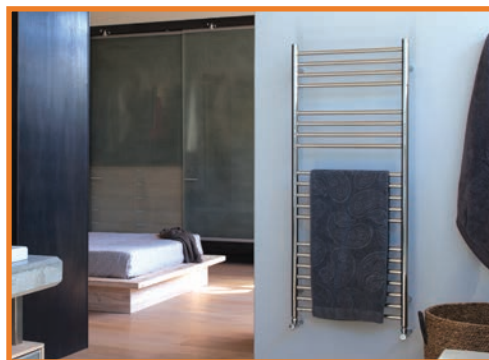

LIQUID-FILLED COLLECTIONS:
JEEVES | TRADITIONAL

DRY-ELEMENT COLLECTIONS:
SIRIO | QUADRO | ELORY | VEGA | ANTUS | SOLO | SWIVEL | RADIANT

HYDRONIC UNITS

Not to be confused with liquid-filled models, hydronic units connect to existing closed-loop hot water systems to heat themselves up. This is the same way traditional 'radiators' function — there is no electrical connection to heat the bars. The heat output of hydronic units are going to depend on how hot you have your water heater set. These units will require a valve kit to attach to the closed-loop water system, sold separately.

Hydronic models are available for most Collections as a special order item:
[See individual Collection pages for information and availability.](#)

HOW LONG DO THEY TAKE TO WARM UP?

As your Heated Towel Rack warms up it starts to transfer that heat to the towel — how long this process takes will depend on the maximum heat output, as well as how many bars are in contact with the hanging towel, and finally the ambient temperature where it is installed. Our Heated Towel Racks are all designed and built to be left on 24 hours a day, though some users may choose to install one with a programmable timer or a countdown switch. When using a separate timer, please allow sufficient time for the unit to reach its operating temperature and warm your towel when setting the program.

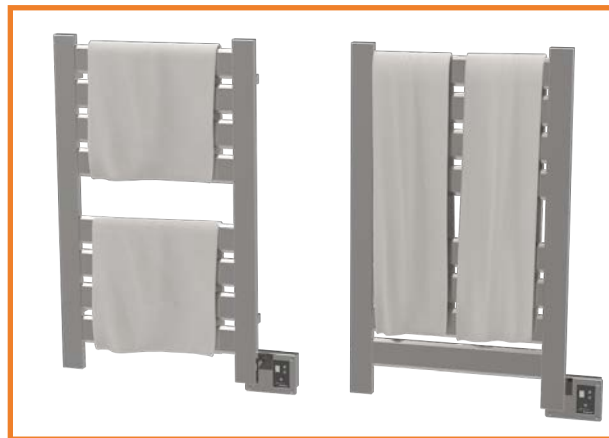

WHAT ARE THEY MADE OF?

The majority of our Heated Towel Racks are made with the finest 304-grade stainless-steel — this high-quality metal is more resistant to corrosion, perfect for the moisture-filled conditions in which you usually find Heated Towel Racks. If cleaned and maintained properly, our models can remain pristine for many years.

Traditional Collection models are made with high-quality mild steel.

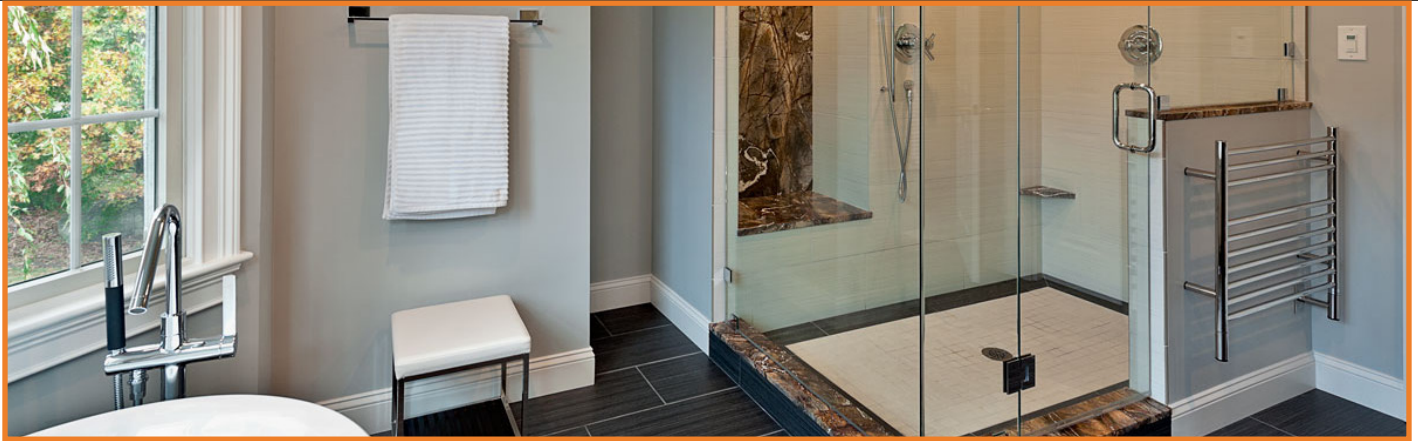

WHAT IS THE BEST WAY TO HANG TOWELS?

To get the most out of a Heated Towel Rack, you want to make sure you fold your towels to maximize the surface area that will be in contact with the bars. The way you fold and hang your towel will depend on the configuration and size of your Heated Towel Rack, as well as the style and thickness of your towel. For a typical 2-towel set up on a ~20" wide model, the best method to maximize efficiency is to fold towels in half width-wise, and then hang them over the top bar side-by-side, so that the bars are 'sandwiched' between the inside folds. By hanging your towels like this you trap heat which helps maintain the temperature and speeds up the transfer rate.

TWO EXAMPLES OF HOW TO HANG TOWELS EFFICIENTLY

Any room or area where you are likely to use a towel can benefit from the function and style of one of our Heated Towel Racks! For safety we always recommend consulting a certified electrician when installing our products to make sure that local electrical code is adhered to.

BATHROOMS

Heated Towel Racks replace your standard towel bars and provide your bathroom with a stylish and functional upgrade — Step out of your shower into a dry, warm towel! Hang up your wet towels and rest assured that they will dry off quickly and efficiently, saving your bathrooms from that damp, moldy smell while reducing need to wash towels as frequently! Larger Heated Towel Racks can even function as space heaters for colder bathrooms, helping to reduce humidity. There are other areas of the home that can benefit from a Heated Towel Rack:

LAUNDRY ROOMS

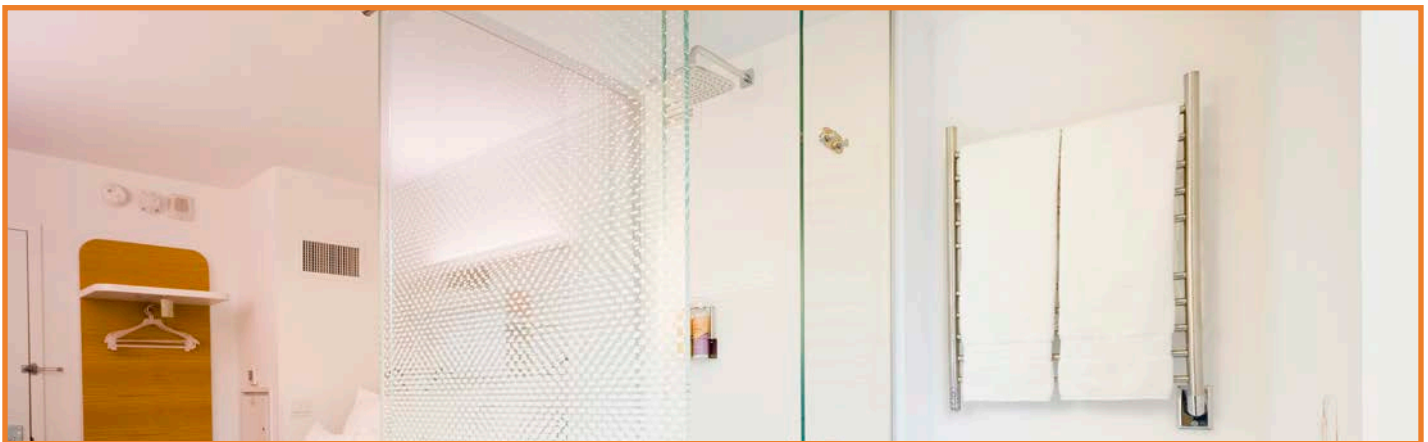

Heated Towel Racks can safely dry more delicate items — some models include a digital heat controller for precise heat control.

MUD ROOMS

Welcome wet clothing with a nice Heated Towel Rack and make sure that they have a place to dry off completely, saving a trip to the laundry hamper!

BASEMENTS / GARAGES

Larger, higher output Heated Towel Racks can help keep some places dry and warm, while providing hanging space for towels or other clothing.

HOTELS

Heated Towel Racks are an incredible luxury and major asset to any hotel bathroom — especially bathrooms with little to no ventilation for air-drying. Guests can enjoy the comfort of a dry, warm towel while benefiting the hotel and environment! By incentivizing guests to reuse their towels with our Heated Towel Racks, less towels need to be washed on a daily basis —reducing water, energy, and soap used in laundry service. No need to sacrifice guest comfort in the name of sustainability when they happily reuse their dry, warm towels off of a Heated Towel Rack!

POOLS & SPAS

Keep towels dry and warm, ready for a pool day or spa-like experience wherever they are needed.

BOATS & YACHTS

Heated Towel Racks can even be included on boats or yachts to bring their style and functionality on board.

CONTROLS

There are many ways to control your Heated Towel Rack: Turn your Heated Towel Rack on and off, or control when and for how long it stays on for with our range of control accessories. Even if your model features an integrated switch, these extra controls can help optimize your usage or add extra convenience. Controllers on this page are sold separately.

DOES NOT INCLUDE COVER PLATE

PROGRAMMABLE TIMER

SKU	ATW-T24 ATW-T24-BL*
LIST PRICE	US \$60*

HARDWIRED ONLY
5 YEAR LIMITED WARRANTY

7 DAY / 24 HOUR PROGRAMMABLE TIMERS

Program your Heated Towel Rack to turn on and off based on your schedule. Recommended for those with regular routines looking to automate their bathroom routine.

We recommend using these timers to have your Heated Towel Rack turn on roughly 1–2 hours before you intend to use your towel, so that it has enough time to get to its operating temperature, and additional time for that heat to transfer to the towel. You then want to program it to turn off a few (2-3) hours after you have used your towel, so it has plenty of time to dry completely.

Both the Hardwired and Plug-In Programmable Timers work the same way and can be set to manual mode, making them operate like a standard on/off switch.

Hardwired Timer comes standard with Light Almond / Ivory / White control panel cover.

*Color Conversion Kit for Black switch available at additional cost [\$10]

PLUG-IN PROGRAMMABLE TIMER

SKU	ATW-P24
LIST PRICE	US \$40

PLUG-IN ONLY
5 YEAR LIMITED WARRANTY

DOES NOT INCLUDE COVER PLATE

COUNTDOWN TIMER

SKU	ATW-CDT ATW-CDT-BL*
LIST PRICE	US \$60*

HARDWIRED ONLY
5 YEAR LIMITED WARRANTY

COUNTDOWN TIMER COMPATIBLE WITH HARDWIRED MODELS

Turn your Heated Towel Rack on for a specific amount of time: 2, 4, 8, or 12 hours — great for those who do not want to leave their units on continuously, but also do not want to limit usage to a specific schedule like with the Programmable Timers.

Hit the desired duration to power on your Heated Towel Rack then give it enough time to reach its operating temperature and transfer heat to the towel. The Countdown Timer will then turn off the unit after the designated amount of time has passed. The unmarked button operates as a standard on/off switch.

Comes standard with Light Almond / Ivory / White control panel cover.

*Color Conversion Kit for Black switch available at additional cost [\$10]

PILOT LIGHT SWITCH COMPATIBLE WITH HARDWIRED MODELS

A large on/off switch with indicator light — be able to tell if your Heated Towel Rack is on at a glance. This control pairs well with Jeeves Collection models, which do not have integrated switches.

For Heated Towel Racks with integrated switches, a supplemental Pilot Light Switch can be installed where desired for added convenience — for example: directly next to bathroom light switches for easy access.

Available in Almond / White

DOES NOT INCLUDE COVER PLATE

SKU	ATW-S-A ATW-S-W
LIST PRICE	US \$30

HARDWIRED ONLY
5 YEAR LIMITED WARRANTY

DIGITAL HEAT CONTROLLER

DIGITAL HEAT CONTROLLER

Just like the name implies, these controllers allow control of heat with nine different settings. It also functions as a standard on/off switch. Adjust the heat level with a push of a button allowing for flexible use of your Heated Towel Rack under any condition! Turn down the heat to hang and warm items like bathrobes or delicates like silk. While we highly recommend using the Digital Heat Controller with all included models, it is possible to use a standard single gang box push-button switch instead. [sold separately].

Left-assembly units with the Digital Heat Controller are available by special order for compatible models. The orientation of the DHC, however, does not change.

COMES STANDARD WITH THE FOLLOWING COLLECTIONS:
SIRIO* | QUADRO* | VEGA | ANTUS | ELORY
[INTEGRATED]

**Not included with Quadro Q2016 or the Sirio S2121*

THE DIGITAL HEAT CONTROLLER IS NOT COMPATIBLE WITH:
JEEVES | SOLO | SWIVEL | TRADITIONAL | RADIANT

REMOTELY WIRED DIGITAL HEAT CONTROLLER

This optional Digital Heat Controller can be installed anywhere along the hardwired circuit, allowing it to be placed in more convenient locations, even across the room, and not just immediately behind the Heated Towel Rack. This replaces the standard Digital Heat Controller with a single gang box as shown the example. A single controller can be wired to multiple Heated Towel Racks if desired.

This does NOT allow for remote control of the unit, but rather for it to be wired independent of the Heated Towel Rack itself.

The stylish, Italian-made Sirio Collection features a contemporary design with round horizontal bars. This versatile Collection is perfect for drying and warming towels. Made of high quality stainless steel, the Sirio Collection is offered in brushed, polished, oil rubbed bronze and satin brass finishes. We offer additional sizes and colors as special order items. Each Sirio (excluding S2121) includes a digital heat controller, allowing the choice of 9 different heat levels.

TERMS AND CONDITIONS OF SALE

TERMS AND CONDITIONS OF SALE FOR AMBA PRODUCTS LLC (“SELLER”)

1. All products supplied are deemed to be free from manufacturing defects and in working order. Ownership is transferred on payment of the full purchase price as agreed and noted in the purchase order furnished by the buyer and confirmed by the seller.
2. Prices are quoted ex Atlanta, GA, USA and do not include shipping and handling costs [US Only]. The shipping and handling costs will be agreed at time of order.
3. Net payment is due thirty [30] days from the date of shipment for credit qualifying customers. A charge will be added to the unpaid balance on all invoices not paid by the due date.
4. Seller's liability is limited to the cost of the product and does not include the cost of any other charges. Seller shall not be liable to or responsible for any consequential damages whatsoever, including but not limited to any damage or loss resulting from delay or default in delivery due to any cause.
5. Buyer expressly acknowledges and agrees that it waives any and all claims for consequential damages and/or any damages under Georgia General Laws. Seller's only liability hereunder shall be for replacement of defective goods. Replacement will be given only after Seller's inspection of the goods and its agreement to the claimed defective condition. Seller will replace product but will not accept any responsibility for installation or removal or any transport costs.
6. All claims shall be deemed waived unless made in writing and delivered to Seller within sixty [60] days after receipt by Buyer. A Guideline for Product Returns is available and needs to be followed when returning defective or damaged product.

PRODUCT WARRANTY

The seller offers a warranty for products that have been installed according to the installation instructions supplied with the product. The duration of the warranty varies depending on the product. Proof of purchase must be supplied with claim. Warranty begins 30 days from invoiced date. The warranty covers defects in workmanship and materials. This warranty is only valid for product purchased and used in the United States, Canada and Mexico.

DURATION OF WARRANTY:

HEATED TOWEL RACKS

JEEVES Collection – 10 years.*
QUADRO Collection – 3 years.
SIRIO Collection – 3 years.
ELORY Collection – 3 years.
VEGA Collection – 3 years.
ANTUS Collection – 3 years.
SOLO Collection – 2 years.
SWIVEL Collection – 2 years.
TRADITIONAL Collection – 3 years.*
RADIANT Collection – 2 years

*If the electric element in the Jeeves or Traditional heated towel rack is faulty it will be replaced within the first 2 years for any reason. Thereafter, elements can be replaced at a cost which is available on application. Power surges affect all electrical appliances and we cannot be held responsible beyond this period.

RETURN/WARRANTY POLICY

RETURNS

If you would like to return your item within thirty (30) days of your order ship date please contact the retailer you purchased the product from to receive an RGA (Return Goods Authorization). We will only accept a return if it is returned in the original manufacturer's packaging and has not been manipulated in any way. (The 16 AWG wire must not be damaged or cut; all assembly fittings must be in the original packaging.)

Returns of incorrectly ordered products are subject to a restocking fee. If you have ordered incorrectly, wish to order the correct product and return the incorrect product, your restocking fee will be 15%. Once the product has been received at our warehouse, it will be inspected and you will be credited for the returned product less the applicable restocking fee and original shipping and processing charges. If you choose to place a re-order the restocking fee will not be waived. The return of the product is at your expense.

If you wish to return a product but do not place a reorder, the restocking fee will be 25%. Once the product has been received at our warehouse, it will be inspected and you will be credited for the returned product less the applicable restocking fee and original shipping and processing charges. **Items returned after 90 days are subject to a 40% restocking fee or may not be returnable at all (This applies to current versions only)**

WARRANTY POLICY

If, within thirty (30) days of your order ship date, any product proves to be defective please contact your retailer immediately. Please DO NOT ship the product back to us without contacting us first and receiving an RGA (Returned Goods Authorization) Number and return instructions. We will only accept a return if it is returned in the original manufacturer's packaging. Pick up / replacement item(s) can only be sent to or picked up from the original "ship to" address. Only one pick-up attempt will be made.

Any time after the thirty-one (31) days of your order ship date, if a product proves to be defective; please contact your retailer immediately. Warranty begins 30 days from invoiced date. Please DO NOT ship the product back to us without contacting us first and receiving a RGA (Return Goods Authorization) Number and return instructions. It will be the customers' responsibility to get the product to and from Amba Products. This will be at the customer's expense. Please be sure to adequately package your product; Amba Products will not be held responsible for any damages that occurred during shipment. Once the product is received it will be properly inspected and tested.

Should we determine that the product is in fact defective, under warranty terms, it will be repaired and tested at our facility. You will be notified when your product will be ready for pickup or collection. If you choose to return the defective item, rather than replace it, we will charge a 15% restocking fee and your original shipping and processing charges will not be refunded. All transactions must take place under the original Purchase Order. This may only be done within the product warranty period. We will let you know our decision once we respond to your request.
