SEACHROME
Lift-Assist™

EXCLUSIVE, PATENTED EASY LIFT TECHNOLOGY
FOR ADA COMPLIANT BATH ACCESSORIES

LIFT WITH EASE. SPECIFY WITH CONFIDENCE.

At Seachrome, we are proud to provide customers with the safety, style, durability and peace of mind associated with ADA-compliant products since the original mandate in 1991. We continually invest in independent testing, to ensure that our products offer uncompromising security and ADA compliance. Our innovative, exclusive and proprietary Lift-Assist Technology makes Seachrome the only accessibility product manufacturer to offer total ADA compliance across our full line of shower seats.

Lift-Assist Technology employs our user-friendly, patented spring support mechanism that has been developed to seamlessly integrate into the design of Seachrome shower seats. It has been rigorously tested and engineered to enable ease of use when the seat is lifted into place. It further ensures that Seachrome shower seats require less than five pounds of force to lift, regardless of seat size or seat top material. Lift-Assist seats are ideal choices for commercial projects where ADA compliance is required, or for Aging in Place home remodels where safety and peace of mind are at a premium. In any application, when you specify Seachrome seats, you can rest assured that you are offering clients the benefits of our Lift-Assist Technology, as well as the security of a total ADA-compliant solution.

Easy to lift with
less than five
pounds of force
