

MATERIALS & FINISHES

ANTIQUÉ
natural color of the bronze
with a rich, warm reddish-brown
overlay pattern

NATURAL
natural color of the bronze,
hand rubbed, and sealed to
inhibit tarnish

LUSTRE
natural color of the bronze
polished to a soft sheen
and sealed to inhibit tarnish

OIL-RUBBED
Jaye Design's version
of the traditional
darkened bronze patina

MINK
a deep, dark iridescent
brown-black with shades of
eggplant patina over bronze

WROUGHT
a soft matte black patina
that transforms bronze
into a wrought iron look

STAINLESS
a warm hand cast
stainless steel polished
to a lustrous sheen

SATIN STAINLESS
a hand-applied satin finish
on warm, hand cast
stainless steel

GUNMETAL
an iridescent
charcoal-gray
patina over bronze

BLACK
solid black patina
with a soft sheen
over bronze

Sóko by Jaye Design's products are manufactured in two materials, hand cast bronze and hand cast stainless steel. Our stainless steel is 316 marine grade. These materials are available in ten standard finishes and custom finishes. Slight color and shade variations are inherent in the chemical patina process. When ordering additional product to be used in conjunction with previously purchased product, a sample is strongly recommended to ensure closest finish match. Every effort has been made to finish our products in a protective way; however, bronze will inevitably darken as it ages. Photos and descriptions are not ideal representations of finishes and finish samples may be purchased for clarification.
