

SUN VALLEY BRONZE

Fine Solid Bronze
Architectural Hardware

OUR STORY

Bob Commons, owner and founder of Sun Valley Bronze, has had a long career in fine home building as a skilled craftsman. During his years as a carpenter, Bob realized there was a deficiency in one aspect of the custom homes he was building. Local builders were exhausting great efforts on the details and finishes of finely crafted homes, but the hardware available had gone the way of mass production, lacking the handcrafted quality that was represented in other areas of the custom home construction process.

Recognizing this void in the industry motivated Bob to begin carving patterns and experimenting with casting in his garage in Hailey, Idaho. He acquired a used furnace from a local high school shop and began melting all manner of reclaimed objects. He realized early on that only the highest grade art bronze could yield the quality he was looking for. With over 40 years of experience in the trades, he is still passionate about bringing the highest quality craftsmanship to his work.

Sun Valley Bronze has grown from its humble beginnings in Bob's garage to a successful business that uses the latest in casting, machining and software technologies. Although the technology has advanced over time, the guiding philosophy of maintaining handcrafted quality lives on in the heart of this family owned and operated company. Every piece of Sun Valley Bronze hardware is made to order, created, and assembled by hand in our studios and foundry in the beautiful mountains of Idaho.

CONSIDERING THE FUTURE

How we are working to minimize our impact

At Sun Valley Bronze, we are committed to minimizing our impact on the environment.

From the office to the workshop, recycling has long been an important part of our philosophy. All of the bronze scrap created as a result of our machining and casting operations is reclaimed and reconstituted into art grade bronze, which we reuse in ingot form. The sand casting process we employ is water based and completely recycled from one casting to the next.

Sun Valley Bronze hardware is 100% locally manufactured. No aspect of our process is outsourced overseas. With a growing awareness of our carbon footprint, another important green consideration is how far our product must travel before it reaches the consumer.

Even the majority of our manufacturing equipment is made in the USA. Not only is this great for keeping local manufacturing alive, it means we exhaust fewer resources and emit less waste as we expand our business.

We look forward to improving our efforts as we grow. Sun Valley Bronze has always strived to provide a healthy work environment for our employees. We are equally committed to minimizing our impact on the environment for future generations as we continue to evolve as a company.

TECHNICAL ADVANCES

CUSTOMER SERVICE

The Sun Valley Bronze hardware collection offers unlimited combinations. Any knob, ring pull or lever can be combined with any of our wide range of escutcheon plates.

Our catalog is designed as a tool to assist in the custom hardware selection process. Once a design is chosen, a Sun Valley Bronze representative can work with you in further specifying functional and decorative products to coordinate with and enhance your project.

The oxidation process that Sun Valley Bronze uses to create patinas is an accelerated version of natural exposure to time, touch, and environment. Repeated handling of the hardware will lead to the graceful wear of the patina. Sun Valley Bronze believes patina wear is an inherent quality of the hardware. As with any hand-applied patina finish, color variations should be expected, lending character and distinction to elegant design.

RAW BRONZE

In addition to our standard patina selection, Sun Valley Bronze offers two raw finishes.

- S** Silicon bronze. No patina applied to the flat, tumbled bronze. Color is a light brown with a matte finish.
- W** White bronze. No patina applied to the flat, tumbled bronze. Color is a nickel-silver with a matte finish.

W

CS-701 IN W2 FINISH

SILICON BRONZE

Silicon bronze contains the elements copper, silicon, and zinc resulting in a golden-copper hue.

Color range: Polished Natural / Reddish-Brown / Dark Brown

- S1** Satin silicon bronze. No patina applied. Color is light honey brown. This finish will naturally oxidize with age to a light reddish-brown with some green in high humidity installations.
- S2** Medium reddish-brown patina. Color will darken over time.
- S3** Dark brown patina. Often referred to as an oil-rubbed bronze finish (similar to US10B).

S1

S2

S3

WHITE BRONZE

White bronze contains the elements copper, manganese, nickel, and zinc resulting in a silver hue.

Color range: Polished Nickel / Pewter Grey / Black

- W1** Satin white bronze. No patina applied. Color is bright nickel-silver.
- W2** Medium pewter grey patina (similar to US15A).
- W3** Dark grey / black patina.

W3

CARING FOR PATINAS

Bronze is naturally weather resistant. Very little care is needed to maintain it. Sun Valley Bronze recommends cleaning bronze hardware with mild soap and water. Do not use abrasive or chemical-based cleaners. Apply several coats of high quality clear paste wax to protect the finish.

WARRANTY

Sun Valley Bronze warrants a lifetime guarantee for its bronze hardware and bronze accessories to be free of defects in materials and workmanship. Patina finishes are not covered by this warranty. Sun Valley Bronze shall not be held liable for any indirect, special or consequential damages, including accident, misuse, abuse or improper installation. All Sun Valley Bronze hardware must be installed, removed and/or reinstalled by a professional hardware installer or all warranties are void. Please refer to our specification manual for full warranty information.

RAW MATERIAL

Sun Valley Bronze uses only the finest art-grade bronze for consistent, high quality castings. New ingots are transformed into architectural hardware. Scrap bronze from sand castings is recycled into subsequent castings, and even the floor sweepings are saved and sent to recycling centers.

PATTERN MAKING

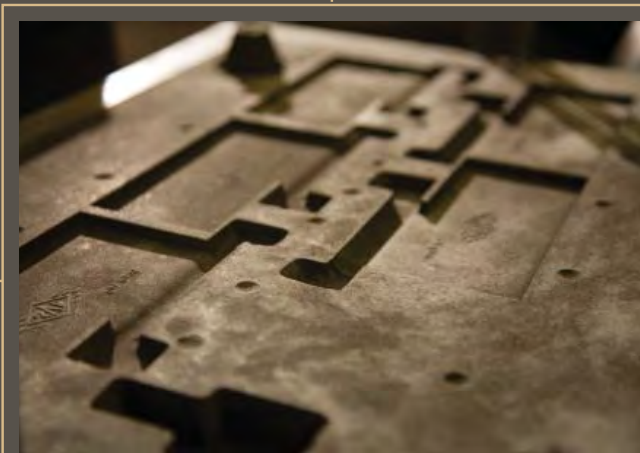

Patterns originate as an idea on paper. The design then begins to take shape traditionally in hand-carved wood or resin models, or by implementing sophisticated 3D modeling software.

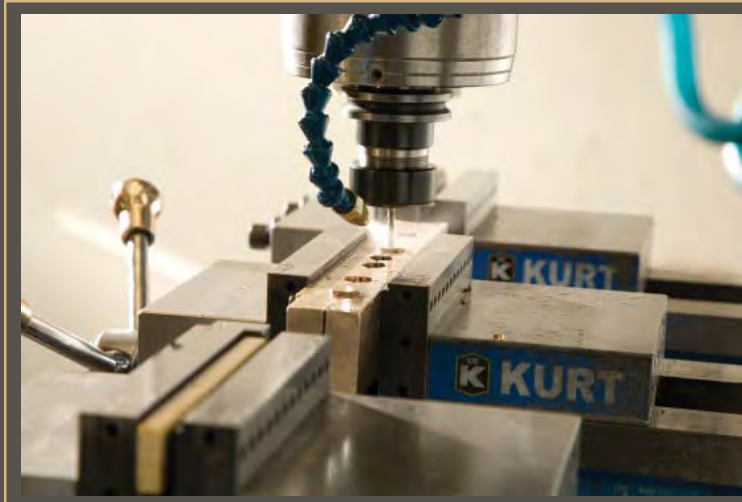

CASTING

A row of flasks with ingot weights stands ready for casting. The furnace heats up to a pouring temperature of 2250° fahrenheit.

PRECISION MACHINING

Precision machining ensures that every piece of Sun Valley Bronze hardware functions perfectly and meets our exacting specifications.

ASSEMBLY

Sun Valley Bronze hardware assembly includes stainless steel components and teflon coated springs for flawless function, and to ensure longevity in humid or coastal climates.

BEAUTIFUL PATINAS

Hand applied non-toxic patinas take the place of time and nature to oxidize copper and other alloys, giving the bronze a deep, aged look and feel.

FINISHED HARDWARE

Sun Valley Bronze showrooms display a variety of styles and patina choices. Whatever your project, residential or commercial, it is easy to mix and match designs and finishes.

PATENTED ADJUSTABLE LIFT-OFF HINGE

This remarkable hinge incorporates innovative design, precision machining, and a stainless steel ball bearing, to create a low-friction, smooth operating hinge that is easily adjusted.

A pair of matched hinge leaves are fitted around an adjustment mechanism and tension pin that allow vertical adjustment of either hinge leaf relative to the second hinge leaf at any time. Partial threading of the mechanism and tension pin prevents over-adjustment, thus protecting the structural integrity of the hinge. The stainless steel ball bearing, fitted between the hinge leaves, reduces friction and extends the useful life of the hinge. The hinge is easy to lift-off by simply lifting upward. Long term performance is assured through meticulous design details.

TECHNICAL ADVANCES

Innovation in design, both aesthetic and functional, is what keeps Sun Valley Bronze an inspired and constantly evolving company.

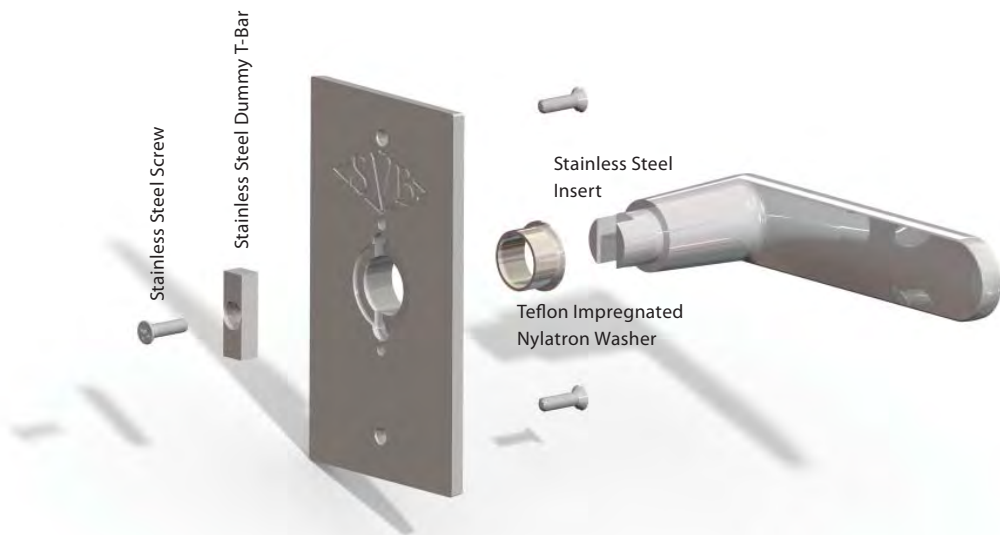

Precision machining and practical engineering ensure our products are of superior quality throughout. Sun Valley Bronze designs for longevity and lasting functionality, using only the finest grade bronze for castings and stainless steel for internal mechanisms.

Sun Valley Bronze internal spring assists and limiters are made of the highest quality stainless steel that will not corrode in humid or coastal climates. Teflon-coated for smooth operation, our stainless steel springs are an integral part of the technical advances, which ensure that Sun Valley Bronze hardware is built to last. Our revolutionary spring assist is so durable that it outlasted the cycle tester; the tester itself failed at 1.5 million cycles.

Careful attention to detail makes our hardware FIELD REVERSIBLE and FIELD SERVICEABLE, setting Sun Valley Bronze apart in the industry. Our entry sets are interchangeable from active to dummy function and feature reversible handing. All machining is performed on state-of-the-art equipment, capable of meeting tolerances to 1/10,000th of an inch, producing uncompromised quality and lifelong performance.

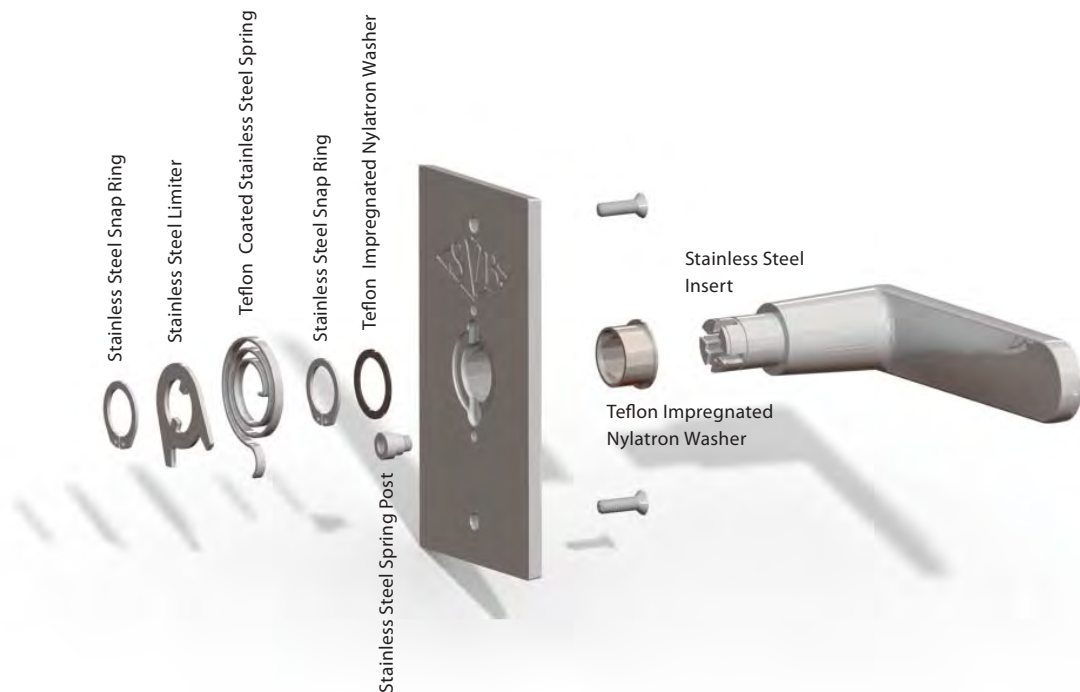

HARDWARE
AS BEAUTIFUL
ON THE INSIDE
AS IT IS ON
THE OUTSIDE

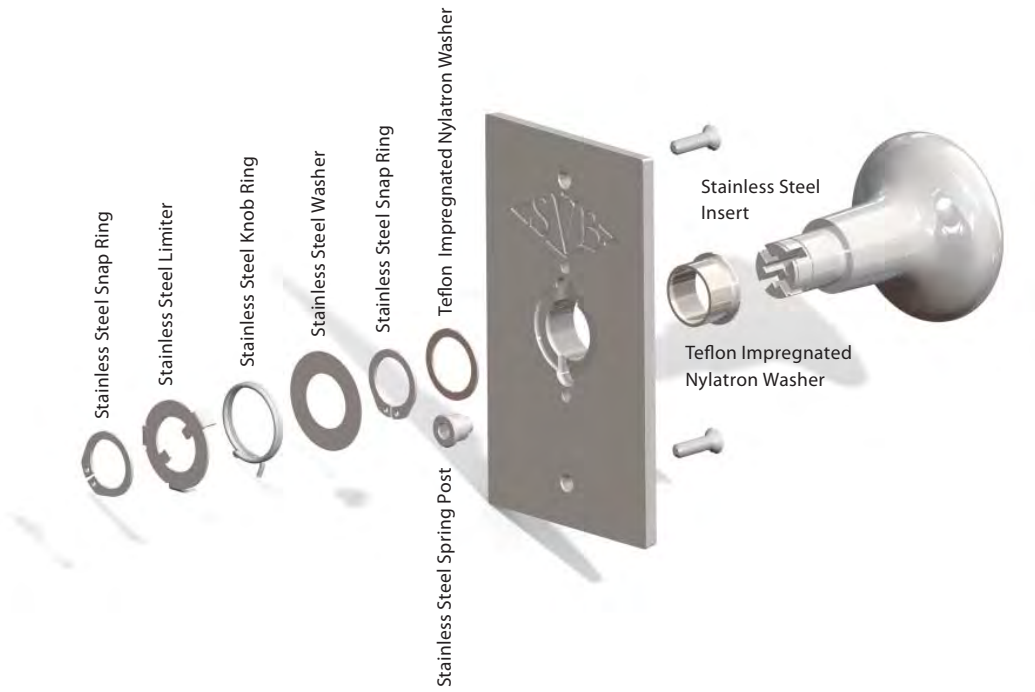

DUMMY SYSTEM

- Field reversible.
- Interchangeable from active to dummy function.
- All components are stainless steel to resist corrosion and wear.

SPRING ASSIST

- Field reversible.
 - Interchangeable from active to dummy function.
 - All components are stainless steel to resist corrosion and wear.
 - Spring is teflon coated to resist squeaking.
 - Available with 2 spring strengths: regular and heavy duty.
 - Tested to over 1.5 million cycles before the cycle tester failed.
- The spring assist could have kept going.

KNOB ASSEMBLY

- Field reversible.
- Interchangeable from active to dummy function.
- All components are stainless steel to resist corrosion and wear.
- Can be used with levers for multi-point lock applications.

HINGE ASSEMBLY

- Stainless steel ball bearing.
- Low friction, smooth operation.
- Adjustable.

MADE TO ORDER

All Sun Valley Bronze hardware is custom manufactured for each order.

EXPERT ASSISTANCE

Sun Valley Bronze showrooms provide assistance with planning, ordering, and specifying all hardware components to meet your special needs. They are trained in installation procedures and adept at on-site problem solving. Depending upon your project, or mechanical inclination, your representative will recommend skilled installers.

CUSTOMER SERVICE

While our showrooms provide local support and expertise for your project, the team at Sun Valley Bronze is always available to answer questions, replace lost parts, or walk you through an installation.

EXPERIENCE THE EVOLUTION

Sun Valley Bronze is constantly expanding our collection of hand-crafted solid bronze hardware with new and original design ideas. Please contact a representative near you to learn more about our latest projects.
