

## BD4000 Privacy Lock for Sliding Barn Door

### Application

- A simple and elegant privacy lock for barn door openings for either residential or commercial applications, without having to build out extra frames
- Tubular drive-in bolt installed inside the jamb
- Dust-proof strike installed in the door on trailing side
- Discrete release button with decorative cap installed on outside of the door for emergency release
- A variety of trim escutcheons with t-turn installed on jamb side allow locking and unlocking of the bolt from inside
- ADA t-turn available for commercial and hospitality applications
- Two backsets available

### Overlap

\*Door Overlap is the distance from the edge of the door to the edge of the wall. Measure the Door Overlap on the lock side when the door is fully closed.

NOTE: Standard door opening walls have 2 wood studs behind drywall or trim casing.

### Installation

- Available on leading and trailing side of the Barn Door
